What It Covers

One row per listed person or organization profile.

- Status is as of October 12, 2026.
- Status reflects the five governments' asset-freeze lists. "not listed" means the name was not on that list on the data date.
- Dates are the listing date shown on the profile; a blank date with status designated means the profile states the listing but not its date.
- 946 rows are on at least one of the five lists; 68 rows are MEF Iran Ledger profiles on none of them, sourced to the profile page.
